

WESSEX WATER WATERWATCH CHALLENGE

Tally

Name

Date

How much water does your family use in a week?

Activity	Approximate litres used each time	Make one tally mark for each time	Total	Number of tallies x rate in litres, eg, 20 flushes x 9 litres = 180 litres
Flushing the toilet	5/9 litres			
Washing your hands	3 litres			
Having a bath	80 litres			
Having a shower	45 litres			
Cleaning your teeth	0.5 litres (tap off)			
Using washing machine	60 litres			
Washing car using hosepipe	9 litres per minute			

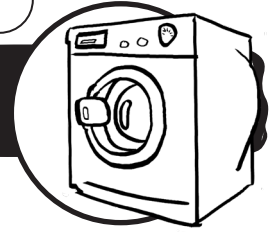

Are you surprised about how many times your family does these activities in a week?

What other activities does your family use water for?

How could you save water?

WESSEX WATER WATERWATCH CHALLENGE

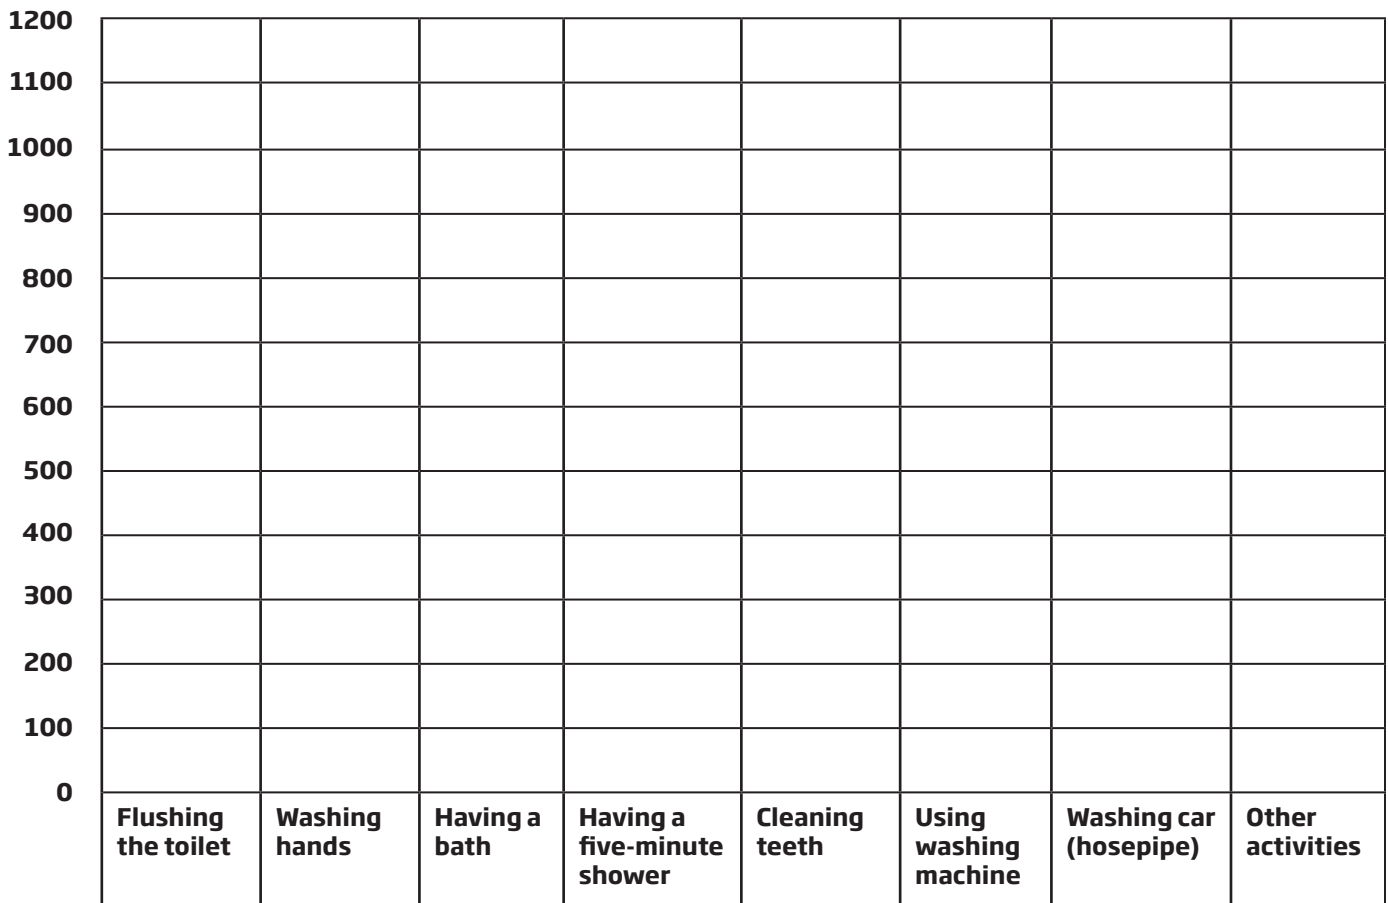

Bar chart

Name

Date

How many litres did you use? Can you put this information on a bar chart?

How many litres is your family using in a week (rounded up in 100s)?

What does this data show you? Are you surprised about how much water is being used? Think about all the other activities that use water, eg, drinking, cleaning, cooking. How much more water do you estimate is used for these activities?

How could you save water?
